- Fits widths 76cm – 83cm
- Up to 139cm with extensions
- Height 79cm
- Can stay open at 90°

• Amanagate *Magneto* 139 •

Instructions

Thank you for choosing our product. Please read these instructions carefully before installing the gate, and keep them for future reference.

PARTS

Using the wall-cups.  **x 4**
 4 width-adjusters 
 Attach one side of the double-sided sticker to the outside of the cup (flat side). Attach the other side to the wall where the width-adjuster wheels will sit.

Not 
 When you remove the gate from the box, you notice the lock is hanging open and there is a gap. This is normal. Gap will close when gate is installed.

WHERE TO INSTALL..

This gate is suitable for small children up to the age of 2 years old.

This gate is suitable for use indoors, at the top or bottom of stairs, across doorways, and to restrict access to hazards.

This gate can be installed across gaps between 76 and 83 cm wide. With the addition of optional extensions, gaps up to 139 cm can be secured.

Make sure the gate is installed on a flat, secure, strong surface.

USING THE GATE...

How to open: Slide back the top button, lift and hold the bottom button at the same time.

GATE INSTALLATION INSTRUCTIONS

1. Put the 4 width-adjusters in the holes, at the top and bottom sides of the gate.

2. Position the gate. Then rotate the wheels on the width-adjusters so they contact the wall, or cups, and hold the gate in position.

3. Next, tighten the gate firmly in position by adjusting the bottom width-adjusters, both sides together. Make sure the gate is straight, vertical, and on the floor.

4. Then do the same for the top adjusters. Make sure the lock closes correctly.

5. Finally, adjust the 4 width-adjusters making sure the gate is vertical, firm and balanced equally, and opens and closes correctly.

WARNINGS:

- Please follow the instructions carefully.
- This product is a pressure gate and must be installed on a firm, flat surface on both sides, such as a wall or door frame. The gate pressure can cause injury if slips out of position.
- Use only a maximum of two extension pieces, and only one on each side.
- Never position this gate in a window.
- This gate is for domestic use with small children up to the age of 2 years.

SAFETY GATE EXTENSIONS

(If the installation width is more than 83cm)

WIDTH RANGES	For these widths you need one of the following gate and extension(s) combinations:
76cm - 83cm	gate only
83cm - 90cm	gate + 7cm
90cm - 97cm	gate + 14cm / (7cm + 7cm)
97cm - 104cm	gate + 21cm / (14cm + 7cm)
104cm - 111cm	gate + 28cm / (14cm + 14cm)
111cm - 118cm	gate + 35cm / (21cm + 14cm) / (28cm + 7cm)
118cm - 125cm	gate + (21cm + 21cm) / (28cm + 14cm) / (35cm + 7 cm)
125cm - 132cm	gate + (28cm + 21cm) / (35cm + 14cm)
132cm - 139cm	gate + (28cm + 28cm) / (35cm + 21cm)
139cm - 146cm	gate + (35cm + 28 cm)
146cm - 153cm	gate + (35cm + 35cm)

WARNING: Use a maximum of 2 extensions only, and with only one extension on each side.
